Part II.

SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:

Examiner pointed to specification page 7 for portions describing a scenario having information indicating which scenarios are compatible with the scenario. The examiner reads the disclosure as a direct indication of which scenarios are compatible with the scenario which is different from a scenario that specifies only its own constraints without referring to other scenario. The examiner used a match- making analogy that one person can specify his/her criteria on a match-making service without specifically indicating another person is of his/her likes. A scenario including constraints of a particular segment of memory to execute does not know what other scenarios are in conflict with it until constraints from other scenarios are considered. So, the constraints of a scenario are self-contained without referring to other scenarios. The examiner has discussed amending the claim language of claim 1 to specifically point out this difference. The examiner also pointed out the compatibility only exist under a particular test as if each scenario when used standalone has no compatibility issue.

Part III.

☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.

☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.
